Oesophageal Manometry Report

Name **Colin Stubbs**
UR
DOB **13/12/1951**
Date **Thu, 20 Mar 2008**

Indication

Dilated oesophagus on barium, symptoms of regurgitation.

Referring Doctor

Technician

LOS Relaxation **Absent**

Basal	Nadir	% Relx'n
Median 4.1	Median -1.1	100.0
Max 11.3	Max -1.1	
Min -1.0	Min -4.9	

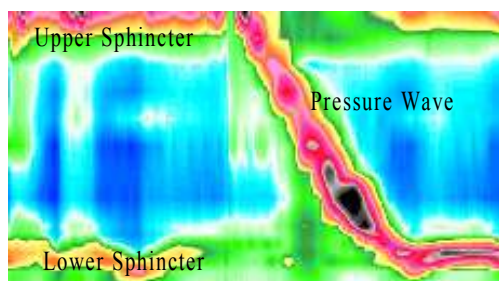

Oesophageal Peristalsis **Absent**

5ml water right lateral Total **17**

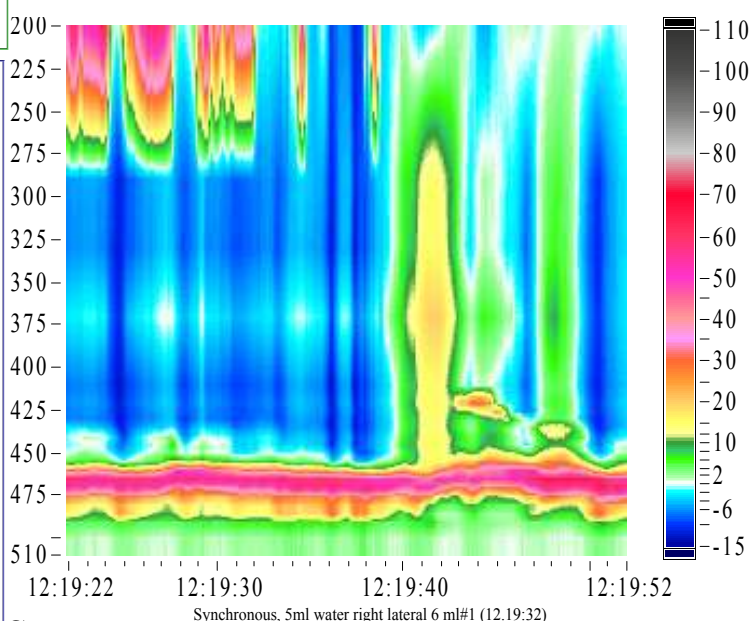

Focal Failure of Peristalsis	6
Generalised Failure of Peristalsis	4
Synchronous	7

5ml water upright Total **11**

Generalised Failure of Peristalsis	10
Synchronous	1

Normal Comparison

Comments

Disordered oesophageal peristalsis. Unable to identify a lower oesophageal sphincter complex at all. Most oesophageal peristalsis was uncoordinated or synchronous. Although at times peristalsis was marginal - indicating that with removal of obstruction this may improve.

Diagnosis

Ineffective Oesophageal Peristalsis
